Experience

Nepal Medical College and Teaching Hospital — Jorpati, Kathmandu
IT Support Technician — April 2026 - Present

- Provided Tier 1–3 IT support for a 24/7 hospital, maintaining 200+ Windows endpoints, 20+ switches, and hundreds of peripherals.
- Streamlined fresh Windows deployments by writing batch/shell scripts for administrative provisioning, static IP assignment, and Group Policy setups.
- Diagnosed and resolved complex hardware, OS, and system incidents to ensure minimal disruption to clinical operations.
- Deployed physical network infrastructure, including LAN cabling, switch box provisioning, and IP surveillance/CCTV systems.
- Configured static IP mappings, subnets, and local network settings to maintain reliable hardware connectivity across the facility.
- Performed routine OS deployments, hardware upgrades, and preventive maintenance across aging Windows systems.

Education

CMR Institute of Technology — Bachelor of Engineering • 7.49 CGPA
Computer Science Engineering — Dec 2020 - June 2024

Technical Skills

Windows Administration	LAN Cabling	Powershell
IT Support	Switch Provisioning	Linux
Golang	Troubleshooting	Python

Projects

Web Server Using Raspberry Pi

- Gained insights into IoT concepts.
- Acquired knowledge of media server functionality, including media management, hosting, and availability.

Currency Recognition App

- Grasped concepts such as dataset creation and data cleaning.
- Developed proficiency in machine learning algorithms through the creation of a model achieving 92% accuracy in detecting Nepali and Indian currencies.
- Learnt to develop GUI applications in Python and integrate trained models for currency prediction
